### Metro Blue Line Signal System Rehabilitation RFP No. C1081

Mass. Electric Construction Co. (License #819912), the Design-Builder and General Contractor has been contracted with the Los Angeles County Metropolitan Transportation Authority (Metro) to **design and build the Blue Line Signal System Rehabilitation Project**. The project will add six new interlockings, two siding tracks, and refurbish the current Blue Line Automatic Train Control and Wayside Signaling System.

Please join us at our Los Angeles outreach event to network with MEC and learn about the project. MEC strongly supports Metro's **12% Small Business Enterprise (SBE) and 3% Disabled Veteran Business Enterprise (DVBE) participation goals** and are in need of your services to fulfill this objective. We are looking to build relationships for this project and beyond. Members of the MEC Team will be available to discuss the project and possible subcontracting and subconsulting opportunities.

#### Who should attend?

SBE and DVBE firms performing construction, engineering, project management, jobsite support, material supply, and equipment services.
